

## **TCC/ATM Statement on the Surface Transportation Reauthorization Act of 2021**

“The Transportation Construction Coalition (TCC) and the Americans for Transportation Mobility (ATM) coalition applaud Chairman Tom Carper (D-Del.) and Ranking Member Shelley Moore Capito (R-W.Va.) for their bipartisan leadership in developing the Surface Transportation Reauthorization Act of 2021. The bill would invest \$303.5 billion to improve aging roads and bridges and support good-paying jobs by providing five years of certainty to state and local highway improvement programs. The TCC and ATM look forward to working with all members of the Environment and Public Works Committee, as well as the other committees of jurisdiction, as they advance a new, robust surface transportation investment bill forward before the Sept. 30 expiration of current law.”

### **About the Coalitions**

[The Transportation Construction Coalition](#) (TCC) and the [Americans for Transportation Mobility](#) (ATM) coalition joined together are a partnership of national associations and construction labor unions representing millions of individuals and businesses with a direct market interest in federal surface transportation programs. TCC and ATM activists can be found in virtually every congressional district and provide a vital service to their communities by helping to improve the efficiency and safety of our nation’s transportation infrastructure.
