

## **Edward M. DePaola, PE**

Ed DePaola, PE is a Principal at **Severud Associates** Consulting Engineers, New York. He is licensed in 18 states, a member of numerous professional organizations including The American Society of Civil Engineers (ASCE) and the American Concrete Institute (ACI), and is president of The Structural Engineers Association of New York (SEAoNY). Over the past 25 years, he has designed numerous projects including high-rise buildings, long-span facilities and special structures requiring innovative structural solutions.

He was the Principal-in-Charge of the tensile membrane structures for the Jeppsen Terminal at the Denver International Airport, and is currently the Principal-in-Charge of One Bryant Park, a 1.8 million square foot (170,000 square meter), 800 foot (245 meter) tall building in mid-town Manhattan. Ed received his BS degree in Civil Engineering and MS degree in Structural Engineering from the University of Notre Dame, and his Doctor of Jurisprudence from Seton Hall School of Law.

Currently, he is a member of the ASCE/FEMA "Building Performance Study Team".
