Vision Statement

I plan focus my attention at the grassroots level to increase communication, collaboration, and the exchange of ideas between Sections, Regions, and the Society. We can unify the membership of the Region and promote growth if we give every Section and Branch a voice. I will foster member engagement and leader development. We must educate our elected officials about the desperate need for infrastructure funding, and as Civil Engineers we can serve as expert resources for our communities. I hope to work with the rest of the Region 4 Board to create best practices that can be shared throughout the Society, and to bring value to our members.
