

ASCE DELIVERS INCREASED VALUE AND SAVINGS TO SMALL ORGANIZATIONS

Companies with fewer than 50 members are eligible for an Associate Partner relationship, designed with the smaller organization in mind. ASCE's Associate Partner Program is a two-year commitment.

With the Associate Partner Program, your employees retain their individual ASCE memberships, and you deliver savings to your organization, including:

- 20% discount on individual society memberships for up to 49 employees.
- Outstanding member benefits, including 75% on ASCE journals, 10 free PDHs per year, *Civil Engineering* magazine, and more.
- Additional discount on ASCE Continuing Education courses, including Live or On-Demand Webinars; P.E., S.E., Environmental exam review courses, and our Guided Online Courses.

Payment for employee local ASCE dues is required. This cost is included in the final purchase price and is not offered at a discount.

HOW DO MY EMPLOYEES BENEFIT?

As an Associate Partner Organization, your employees receive individual ASCE memberships at discounted rates, including:

- Individual member account and login on asce.org
- Full access to ASCE member benefits—www.asce.org/member-benefits
- Use of the ASCE Library—the richest collection of civil engineering content.

CONNECT:

Network with the profession's top leaders and get the latest thinking on trends impacting civil engineering.

LEARN:

Access ASCE's webinars-on-demand, publications, state-of-the-art professional development, and more from civil engineering's premier continuing education provider for more than 45 years.

GROW:

Expand your company's visibility through membership in ASCE's technical Institutes, and networking with peers.

WHO WE ARE

The American Society of Civil Engineers (ASCE) was founded in 1852 and represents more than 150,000 members of the civil engineering profession in 177 countries. ASCE stands at the forefront of a profession that plans, designs, constructs, and operates society's economic and social engine—the built environment—while protecting and restoring the natural environment.

ASCE is a leading provider of technical and professional conferences and continuing education, the world's largest publisher of civil engineering content, and an authoritative source for codes and standards that protect the public.
