

Timber-Strong Design BuildSM Competition

The American Society of Civil Engineers Associations (ASCE) has partnered with the American Wood Council (AWC), APA - Engineered Wood Association (APA), and Simpson Strong-Tie (SST) to bring the Timber-Strong Design BuildSM competition to the following 2021 ASCE student conferences:

- Mid-Continent – Kansas State University (4/16-17),
- New England – University of Rhode Island (4/16-18),
- Pacific Northwest – University of Washington (4/15-17),
- and Pacific Southwest – UCLA (3/25-27).

COMPETITION BASICS:

The TSDBSM competition provides university engineering students an opportunity to experience, among other things, the design and construction of a wood project as well as giving a presentation. Here is a short video from the April 2019 PSWC TSDB Competition https://youtu.be/NKfvPC_OLYo.

Due to the pandemic, the in-person and construction portions of the 2021 TSDB event will be replaced with a virtual build where teams will create a Building Information Model (BIM) of their project and submit a video of their presentation.
