Anne M. Ellis, P.E., FACI, F.ASCE, NAC

Anne Ellis, executive director of the Charles Pankow Foundation, began her career in structural engineering in a 4-person design office and progressed her way to enterprise level positions at Fortune 500 companies.

Anne coauthored the “Concrete Design and Construction” section of the Standard Handbook for Civil Engineers, Fifth Edition. She served as American Concrete Institute president 2013-2014, and for her leadership impact was named by "Concrete Construction" magazine *Most Influential People in Concrete Construction – 2013*.

Anne has been appointed by five different U.S. cabinet secretaries to their federal advisory committees on matters of energy and trade policy. She serves on the boards of two private companies as well as the National Institute of Building Science Board, the Building Seismic Safety Council, and the SEI Futures Fund.
